

LED Spotlight Bar 58cm

Product Images

Short Description

A spotlight bar is an extremely popular choice due to their versatility; they are used throughout the home as they are able to offer good lighting coverage. It has directional spots that are able to be pointed in any direction, they can also be pointed directly at your walls (wall washing) giving even lighting around the room.

Modern Is not always what people expect, it uses clean crisp lines in a simple colour palette, the word here is "sleek", it will often use metal, silver or steel to great effect where the beauty is in the simplicity and less fuss.

Whilst modern is not minimal if you find this range too stark for your tastes we would recommend “Modern Transitional” which brings more classic shapes up to date with a modern edge in it’s design.

Top Tip: Spotlight bars often come in different lengths, if you like this style by wanted a different amount of spots use the **Same Range** tab below to see if there are any other bar lengths.
