Short Description

This downlight wires straight into the mains, without the need to purchase a driver/transformer.

IP65 – Dust Tight and protected against Water jets. Suitable for bathroom zones 1 and 2, not Zone 0 (inside the shower).

All new build and refurbishment projects must comply with Part E Building Regulations. This means downlights like this one must be fire rated to 30, 60 and 90 minutes and also pass the sound proofing regulations.

We can confirm this downlight qualifies for all current building regulations.

Suitable to be used on a dimmer switch, however we advise you use a good quality branded dimmer switch. If you are purchasing dimmable LED bulbs, we advise you use a “trailing edge” dimmer switch.
